Ultra-Light Harness 5 Ways to Wear!

Manufacturer and Distributors of this product do not assume any responsibility or any liability of this product due to misuse or unintended use. Use as instructed for the aid in holding optics, range finders, cameras, GPS, etc. to the user's chest. Any other use than described is not recommended and the responsibility of the user.

To ensure smooth sliding of the harness system, keep quick release clips properly aligned with cord.

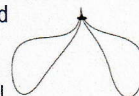

How to Cut Down the Cord Length for Small Users

1. Pull end cap off pigtail hardware with firm gripping pliers
2. Cut cord to desired length
3. Place one cord on each side of T-stem, half way up the stem
4. Force T-stem inside female hardware

How to Wear the Harness

1. Attach split ring to Bino
2. Open harness as shown and place arms through loops
3. Pull harness over and behind head
4. Squeeze adjustment clip and pull cord to desired length
